blenders coffee makers juicers and more web mar 11 2022 the machine must be  
placed on a dry and level surface with sufficient ventilation far from heat  
sources such as ovens heaters and corrosive gases leave an 8 inch clearance  
on all sides of the ice maker for proper ventilation do not fill the water  
reservoir with hot water this may damage the icemaker web ice maker control  
arms are designed to sense a full ice bin and pause ice production at the  
right times so an overflowing ice bin can be a sign that something s not  
right as you narrow down the cause of too much ice production it may be  
helpful to turn your ice maker on and off as needed to avoid overflow web  
never put flammable explosive and corrosive articles into the ice maker  
never use the ice maker when there is flammable gas leakage never store or  
use gas and other flammable articles near the ice maker to avoid any fire do  
not touch the evaporator when using the ice maker or making ice to avoid  
potential frostbite web our ice makers are designed to stop when they re  
full there s two methods for this depending on which type of ice maker your  
model has either an optical sensor detects when ice has piled too high or a  
mechanical arm is pushed upwards when the ice piles high enough if your ice  
maker won t stop making ice this system isn t working web jul 5 2022
