The Psychology of the Car explores automotive cultures through the lens of psychology with the goal of achieving a low-carbon transport future. Worldwide there are now more than one billion cars, and their number grows continuously. Yet there is growing evidence that humanity needs to reach 'peak cars' as increased air pollution, noise, accidents, and climate change support a decline in car usage. While many governments agree, the car remains attractive, and endeavors to change transport systems have faced fierce resistance. Based on insights from a wide range of transport behaviors, The Psychology of the Car shows the "why of automotive cultures, providing new perspectives essential for understanding its attractiveness and for defining a more desirable transport future. The Psychology of the Car illustrates the growth of global car use over time and its effect on urban transport systems and the global environment. It looks at the adoption of the car into lifestyles, the "mobilities turn, and how the car impacts collective and personal identities. The book examines car drivers themselves; their personalities, preferences, and personality disorders relevant to driving. The book looks at the role power, control, dominance, speed, and gender play, as well as the interrelationship between personal freedom and law enforcement. The book explores risk-

taking behaviors as accidental death is a central element of car driving. The book addresses how interventions can be successful as well as which interventions are unlikely to work, and concludes with how a more sustainable transport future can be created based on emerging transport trends. Features deep analyses of individual and collective psychologies of car affection, moving beyond sociology-based interpretations of automobile culture Illustrates concepts using popular culture examples that expose ideas about automobility Shows how fewer, smaller and more environmentally friendly cars, as well as low-carbon transport modes, are more socially attractive Singapore's best homegrown car magazine, with an editorial dream team driving it. We fuel the need for speed! A prodigious talent stalked by controversy, celebrity chef John Burton-Race has always lived life on the edge, and remains nothing if not pragmatic. "I wear people down. I'm a bit of a basket case." Born in Singapore in 1957 to a British diplomat father, Burton-Race helped the family chef while being exposed to global tastes and flavors that still influence his style of cooking. He worked under renowned chef Raymond Blanc at Le Manoir aux Quat'Saisons and when Blanc opened Le Petit Blanc in Oxford, he turned to Burton-Race to head the kitchen. Here the young, aspiring chef would win his first Michelin star. Three years later he opened his own restaurant, L'Ortolan in Berkshire. Awarded two Michelin stars, the achievement was repeated in 2000 at John Burton-Race Restaurant at London's Landmark Hotel. Television viewers, however, bore witness to his mercurial nature in the fly-on-the-wall series French Leave and Return of the Chef, and an appearance on I'm A Celebrity... Get Me Out Of Here ended in disaster when his second wife closed his Devon restaurant while he was in the Australian bush. Possessed of an innate talent for self destruction, John Burton-Race is still driven, still complex, still controversial, still living life at 100 miles an hour. This is his story. Ever Wonder What A Green Renewable Sustainable World Would Look Like? With the state of our world and its limited resources, more and more people are trying to lead a greener lifestyle in order to do their part. The Green Revolution provides comprehensive information associated with adopting daily practices that will ultimately sustain, not deplete, precious natural materials in an ever-growing population. Renewable energy expert Norman Nadeau leads by example as he details how he has committed his life to living green. From the application of solar and wind turbine technology, to recovering energy embedded in places one may not expect (such as animals' manure), The Green Revolution highlights the highly sustainable system Norman Nadeau developed for his family farm. The Green Revolution serves as a broad introduction for those who want to conserve rather than squander. At this very important turning point in our planet's history, this book offers the principles by which anyone can live in the most sustainable way possible. The writer becomes the story when crime reporter Mia Hale is discovered on a Jacksonville beach—bloodied and disoriented, but alive. She remembers nothing, but her wounds bear the signature of a sadistic serial killer. After years lying dormant, The Collector has resumed his grim hobby: abducting women and taking gruesome souvenirs before dumping their bodies. But none of his victims has ever escaped—and he wants Mia back, more than he ever wanted any of the others. FBI agent Eric MacFarlane has pursued The Collector for a long time. The case runs deep in his veins, bordering on obsession...and Mia holds the key. She'll risk everything to recover her memory and bring the madman to justice, and Eric swears to protect this fierce, fragile survivor. But The Collector will not be denied. In his mind, he knows just how their story ends. Car values fluctuate wildly, never more so than in our current economic environment. Pricing information is a must for collectors, restorers, buyers, sellers,

insurance agents and a myriad of others who rely on reliable authoritative data. With well over 300,000 listings for domestic cars and light trucks, and various import vehicles manufactured between 1901 and 2012, this is the most thorough price guide on the market. This invaluable reference is for the serious car collector as well as anyone who wants to know the value of a collector car they are looking to buy or sell. Prices in this must-have reference reflect the latest values, in up to six grades of condition, from the esteemed Old Cars Price Guide database. New information for the most recent model year will also be added to our new Old Car Report database. Offers standard prices for cars, pickups, sport utilities, and vans, as well as detailed model histories, certified used vehicle information, and buying advice. Covers all U.S. and Canadian models of Volkswagen Passat and Audi A4; 1.8L four-cylinder turbo and 2.8L V6 engines. Like it or not, the automobile industry is now and will remain an overwhelming factor in the lives of most people - if not an owner and driver, then as a pedestrian or a breather of air, which is being polluted by the gas-guzzling and vile-air belching monsters created for our individual hedonistic pleasure. This book presents issues of current interest to those who cannot ignore their presence. In the 87 issues of Snow Country published between 1988 and 1999, the reader can find the defining coverage of mountain resorts, ski technique and equipment, racing, cross-country touring, and the growing sport of snowboarding during a period of radical change. The award-winning magazine of mountain sports and living tracks the environmental impact of ski area development, and people moving to the mountains to work and live.

Legislative requirements to reduce CO2 emissions by 2020 have resulted in significant efforts by car manufacturers to explore various methods of pollution abatement. One of the most effective ways found so far is by shortening the cylinder stroke and downsizing the engine. This new engine then needs to be boosted, or turbocharged, to create the full and original load torque. Turbocharging has been and will continue to be a key component to the new technologies that will make a positive difference in the next-generation engines of years to come. Concepts in Turbocharging for Improved Efficiency and Emissions Reduction explores the many ways that turbocharging will deliver concrete results in meeting the new realities of sustainable, green transportation. This collection of very focused technical papers, selected by Mehrdad Zangeneh, PhD., a professor of thermo-fluids at University College in London, provides an assessment of several novel designs intended to improve fuel consumption and cap emissions, while maintaining torque at all speeds. The book is divided into four sections, each addressing the most cutting-edge technologies on the market today:

- o Two-Stage Turbocharging**
- o Variable Geometry Compressors**
- o Unconventional Compressor Configurations**
- o Electrically Assisted Turbocharging**

glory in the world of football. A lifetime supporter of Liverpool FC, Steven is surely the most successful product of the club's youth academy. In such a short space of time, the young trainee reached outstanding form as he continually improved his game. He was the winner of the PFA Young Player of the Year in 2001 and has been nominated for the senior award in recent years. An all-rounded player, he has played a pivotal role for both club and country making him one of the most popular players of all time. As his playing went from strength to strength, he quickly followed in the steps of Liverpool legends such as Ian Rush and John Barnes as he was passed the captains armband in 2005, Gerrard reached an ultimate high as he marched his side to victory in the Champions League Final in Istanbul. With Liverpool crowned the champions of Europe, Gerrard became the greatest hero and a sought after player. But he wasn't finished there. Inspiring Liverpool to another dramatic comeback against West Ham in the 2006 FA Cup Final, Gerrard scored a spectacular goal to help take the trophy back to Anfield.
