The Guts Apr 10 2021 LONGLISTED 2015 – International IMPAC Dublin Literary Award A triumphant return to the characters of Booker Prize-winning writer Roddy Doyle's breakout first novel, *The Commitments*, now older, wiser, up against cancer and midlife. Jimmy Rabbitte is back. The man who invented the *Commitments* back in the 1980s is now 47, with a loving wife, 4 kids...and bowel cancer. He isn't dying, he thinks, but he might be. Jimmy still loves his music, and he still loves to hustle--his new thing is finding old bands and then finding the people who loved them enough to pay money online for their resurrected singles and albums. On his path through Dublin, between chemo and work he meets two of the *Commitments*--Outspan Foster, whose own illness is probably terminal, and Imelda Quirk, still as gorgeous as ever. He is reunited with his long-lost brother, Les, and learns to play the trumpet.... This warm, funny novel is

about friendship and family, about facing death and opting for life. It climaxes in one of the great passages in Roddy Doyle's fiction: 4 middle-aged men at Ireland's hottest rock festival watching Jimmy's son's band, Moanin' at Midnight, pretending to be Bulgarian and playing a song called "I'm Goin' to Hell" that apparently hasn't been heard since 1932.... Why? You'll have to read *The Guts* to find out.

Astrobiology: Future Perspectives Jan 07 2021 Astrobiology, a new exciting interdisciplinary research field, seeks to unravel the origin and evolution of life wherever it might exist in the Universe. The current view of the origin of life on Earth is that it is strongly connected to the origin and evolution of our planet and, indeed, of the Universe as a whole. We are fortunate to be living in an era where centuries of speculation about the two ancient and fundamental problems: the origin of life and its prevalence in the Universe are being replaced by experimental science. The subject of Astrobiology can be approached from many different perspectives. This book is focused on abiogenic organic matter from the viewpoint of astronomy and planetary science and considers its potential relevance to

the origins of life on Earth and elsewhere. Guided by the review papers in this book, the concluding chapter aims to identify key questions to motivate future research and stimulate astrobiological applications of current and future research facilities and space missions. Today's rich array of new spacecraft, telescopes and dedicated scientists promises a steady flow of discoveries and insights that will ultimately lead us to the answers we seek.

Killer Verse Jul 25 2022 **Killer Verse: Poems of Murder and Mayhem** is a spine-tingling collection of terrifically creepy poems about the deadly art of murder. The villains and victims who populate these pages range from Cain and Abel and Bluebeard and his wives to Lizzie Borden, Jack the Ripper, and Mafia hit men. The literary forms they inhabit are just as varied, from the colorful melodramas of old Scottish ballads to the hard-boiled poetry of twentieth-century noir, from lighthearted comic riffs to profound poetic musings on murder. Robert Browning, Thomas Hardy, W. H. Auden, Stevie Smith, Mark Doty, Frank Bidart, Toi Derricotte, Lynn Emanuel, and Cornelius Eady are only a few of the many poets, old and new, whose work is captured in this heart-stopping—and criminally entertaining—collection.

Foundations of Sensation and Perception Dec 18 2021 Do you wonder how movies – sequences of static frames – appear to move, or why 3-D films look different from traditional movies? Why does ventriloquism work, and why can airliner flights make you feel disoriented? The answers to these and other questions about the human senses can be found within the pages of *Foundations of Sensation and Perception*. This third edition maintains the standard for clarity and accessibility combined with rigor which was set in previous editions, making it suitable for a wide range of students. As in the previous editions, the early chapters allow students to grasp fundamental principles in relation to the relatively simple sensory systems (smell, taste, touch and balance) before moving on to more complex material in hearing and vision. The text has been extensively updated, and this new edition includes: a new chapter devoted to attention and perception over 200 new references over 30 new figures and improved, more colorful, visual presentation a new companion website with a range of resources for students and lecturers The book contains a range of pedagogical features, including tutorial sections at the end of each chapter. This distinctive feature introduces areas of the subject which are rarely included in student texts, but are crucial for establishing a firm foundation of knowledge. Some tutorials are devoted to more advanced and technical topics (optics, light measurement, Bayesian inference), but treated in an accessible manner, while others cover topics a little outside of the mainstream (music perception, consciousness, visual art). *Foundations of Sensation and Perception* will enable the reader to achieve a firm grasp of current knowledge concerning the processes that underlie our perception of the world and will be an invaluable resource for those studying psychology, neuroscience, and related disciplines.

Guide to the Local Assemblies of the Knights of Labor Oct 16 2021

Jonathan Garlock's Guide to the Local Assemblies of the Knights of Labor

makes accessible a great deal of information necessary for understanding and evaluating the history and impact of this organization. It provides information on twelve thousand local assemblies organized by the Knights of Labor between 1869 and 1896. Organized geographically by state, county, and community, the Guide provides the assigned local assembly number, dates of existence, and community population for each local. The occupations of the members are given; where known, members' race, sex, and ethnicity are provided.
