**Newborn** Oct 05 2020 Beicher & MacKay's Obstetrics, Gynaecology and the Newborn, 4th Edition is an update of the highly acclaimed Obstetrics and the Newborn, 3rd Edition and Illustrated Textbook of Gynaecology. It is the most up-to-date resource in Obstetrics and Gynaecology targeting those with fundamental understanding of this subject area and is written from the Australian perspective with incorporation of the latest RANZCOG guidelines. Experts throughout Australia and New Zealand have contributed content on the most prevalent topics encountered by obstetricians; gynaecologists and neonatologists today, ranging from global and indigenous reproductive health; sexual assault; gynaecological oncology through to neonatal assessment, malformations and transport. Alignment to RANZCOG guidelines including unique perspectives from the President, provides invaluable information for practice in the Australia. A summary of key points at the start of chapters highlights the main facts which readers should draw from each chapter. A vast range of anatomical drawings, graphs and clinical photos provide a practical perspective on the theoretical component within the textbook. Reference lists at the end of each chapter outline the strong evidence basis that supports the content of this edition. A new editor and contributor team brings

in wealth of expertise from across Australia, New Zealand and internationally. Two new chapters on Global Reproductive Health and Indigenous Women's Health place emphasis on the need to adapt women's healthcare according to various cultural and socioeconomic factors. Emphasis on prevention and early diagnosis in obstetric care, with an increasing focus on fetal medicine. This edition will be available as an Expert Consult eBook along with the print book. The eBook will include enhancements to the images within the book, as enabled by the InKling platform.

Features a wealth of illustrations that make details clearer.

Clinical Obstetrics and Gynaecology Dec 07 2020 The aim of this book is to provide a straightforward summary of the knowl edge

required for examinations in specialist Obstetrics and Gynaecology. Part Two of the examination for Membership of the Royal College of Obstetricians and Gynaecologists would be a good example. The volume is intended as a companion to the highly successful Basic Sciences for Obstetrics and Gynaecology which covers the knowledge required for preliminary examinations. Increasingly, examinations of all types are based on multiple choice questions (MCQ) or structured answer questions (SAQ). No apology is made for the fact that the present book addresses the sort of "fact" which lends itself to testing by this approach. Thus, there is little discussion of speculative or contentious areas, no account of present or future research, and no references. Numerous excellent books are available which cover these topics in a much fuller and more discursive manner, and the present volume does not seek to emulate them.

**Williams Obstetrics, 25th Edition** May 12 2021 The world's premier obstetrics guide—now updated with a greater focus on maternal-fetal medicine The obstetrics text that has defined the discipline for generations of obstetrician-gynecologists is now more timely—and essential—than ever.
